EMERGENCY POWER SUPPLY

TWINLEVEL^o TLC Compact PATENT PENDING

THE SMART THERMOSTATIC MIXER FOR SHOWER AND BATH

TLC Compact is a highly integrated thermostatic mixer with flow rate control and a wide range of additional functions. The combination of powerful drives and individually sealable Flühs ceramic cartridges guarantees exceptional quality and durability. Thanks to our patent-pending Straight Through technology, the valve allows for water flow without dead spaces and with minimal loss of pressure. Three processors provide continuous monitoring of both the functions and the electronics.

Thanks to the integrated rechargeable battery, TLC Compact can still be used even during a power outage. Two flexible water outlets make TLC Compact easy to install.

TLC Compact is hywise-compatible. This makes it possible to cascade up to 10 devices at the same time, allowing for nearly unlimited water intake. It is also possible to serially cascade up to 20 individually controllable outlets. Different interfaces can be used to control TLC Compact.

HIGH-PERFORMANCE

Two outlets with 40 liters per minute hywise enables serial cascading of up to 20 outlets and parallel cascading of up to 400 liters per minute

FAIL-SAFE

Battery operation is activated in the event of a power outage
Self-monitoring multiprocessor technology

COMPACT DESIGN

Hassle-free integration into in-wall box

EASY INSTALLATION

Flexible water outlets and included plug nipples

INTERFACES

TLI, Li-Fi, Bluetooth, mesh, UART, CANopen

DIMENSIONS

Ø 90 mm, H 85 mm
