## TWINLEVEL<sup>o</sup> TLI Remote Wheel

THE WIRELESS OPERATING DEVICE

TLI Remote Wheel is a wireless user interface for TLC mixing valves in kitchen fixtures, bathroom sinks, and bathtubs. Its functions are identical to those of TLI Wheel – from effortless and precise adjustment of temperature and water flow to quick access settings and integrated scalding protection.

TLI Remote Wheel features a wide signal range and long battery life. The included charging station is compatible with all voltage ranges. Cleaning the operating unit and base is extremely straightforward and convenient.

#### HIGH-END REMOTE CONTROL

Wide signal range and long battery life

#### VISUAL FEEDBACK

LED ring allows for visualization of the temperature and flow rate

#### QUICKACCESS

Three temperature settings and programmable flow rate

#### INTEGRATED SCALDING PROTECTION

Gradual increase to temperatures greater than 40°C
